

Discrete Mathematics
Volume 189, Numbers 1–3, 28 July 1998

Contents

Contributions

<i>J. Bae</i> An extremal problem for subset-sum-distinct sequences with congruence conditions	1
<i>E. Barcucci, A. Del Lungo, J.M. Fédou and R. Pinzani</i> Steep polyominoes, q -Motzkin numbers and q -Bessel functions	21
<i>J.I. Brown</i> Chromatic polynomials and order ideals of monomials	43
<i>E. Dobson, H. Gavlas, J. Morris and D. Witte</i> Automorphism groups with cyclic commutator subgroup and Hamilton cycles	69
<i>D.Ž. Đoković</i> Equivalence classes and representatives of Golay sequences	79
<i>J. Eisfeld</i> On the common nature of Spreads and Pencils in $PG(d, q)$	95
<i>D. Fortin and R. Rudolf</i> Weak Monge arrays in higher dimensions	105
<i>Y. Fukuchi</i> Graph labelings in elementary abelian groups	117
<i>R.J. Gould and J.M. Harris</i> Traceability in graphs with forbidden triples of subgraphs	123
<i>E.R. Hauge and J. Mykkeltveit</i> The analysis of De Bruijn sequences of non-extremal weight	133
<i>X.-d. Hou</i> Cubic bent functions	149
<i>L.T.Q. Hung, M.M. Syslo, M.L. Weaver and D.B. West</i> Bandwidth and density for block graphs	163
<i>L.F. Monteiro, M. Abad, S. Savini and J. Sewald</i> Finite free generating sets	177
<i>M. Muzychuk and M. Klin</i> On graphs with three eigenvalues	191
<i>R. Scurr and G. Olive</i> Stirling numbers revisited	209
<i>M. Shi, Y. Li and F. Tian</i> Tree decompositions for a class of graphs	221
<i>E.R. van Dam and E. Spence</i> Small regular graphs with four eigenvalues	233
